FlightAware Reserved Content Area and 300x600 Ad

Background skin must be a static Image. A separate standard leaderboard ad (728 x 90px) can be incorporated into 140px height space for animated ads. If custom creative is supplied to FlightAware, the entire 970 x 140px space can be utilized for an animated or static ad.

Flight Search and Recents area has a slight opacity, so part of your skin will be somewhat visible.

We suggest:
Logos, copy and most important/relevant parts of imagery should stay within a 150px width from left and right edges of FA reserved content area.

Graduating your content out at 700-900px from the bottom of FA header. Height is always variable based on browser window of user.
